

“With the solidly reliable performance of all the EV loudspeaker systems, [this] has opened the industry’s eyes and ears to the importance of good-quality audio equipment.”

– Jason Kelly, Shuttlesound

SOUND SYSTEM SOLUTIONS

FITNESS CENTERS

High-intensity audio areas

Amp up the energy

Create an immersive exercise experience – all the power you need to turn it up for the most intense workouts, and always with big bass performance on tap.

Atmosphere

For lobbies, locker rooms and other non-workout areas, we offer acoustically and aesthetically matched options for high-quality paging and background music. Set the right audio ambience with seamless coverage throughout your facility.

Controlled coverage

Achieve sonic clarity and control in the most challenging acoustical environments with installed loudspeaker systems designed specifically for highly reverberant spaces.

Ease of use

Simple zone and level controls for installed audio systems help your staff focus on helping customers achieve their fitness goals. Plug-and-play portable solutions are quick to set up and easy to use, ensuring every room can be equipped with the sound quality you need, when and where you need it.

Flexible options

Our extensive speaker portfolio includes ceiling, pendant, portable and surface-mount models, giving you background and foreground music options to suit every space and every budget – always with best-in-class sound quality and reliability.

FITNESS CENTERS

System overview

For high-intensity exercise areas, EVC loudspeakers are a standout choice for upbeat sound reinforcement. EVC subwoofers can be added for the extra low-end punch that drives today's workout music.

System benefits

The EVC loudspeaker family provides deep bass and clear high frequencies to give you performance beyond the scope of other small-format loudspeakers.

Protection against excessive power and overheating through tour-grade circuitry in C series amps.

System and group control and supervision through easy-to-use system software.

2x EVC-1181S (subs)

If you need it, we've got it

The EV-Innovation family of loudspeakers is designed to specifically meet the diverse requirements of installed fitness center systems. EV-Innovation currently consists of five system formats: compact two-way (EVC), horn loaded (EVH), front loaded (EVF), line array (EVA) and ultra-compact (EVU).

Models from each series may be mixed and matched for consistent performance across any installation, providing system designers with complementary building blocks to address the needs of a wide range of venues and acoustical challenges.
